

THE LEVEE PROTECTS YOU...TAKE CARE OF IT!

Why?

Driving on the slope of the levee damages the grass and can start severe erosion. This damage is compounded when heavy rains occur or flood water is against the levee.

Levee Board crew and equipment make repairs to the levee slope due to erosions caused by rats

For more information on flood control and what is being done, contact the Mississippi Levee Board at 662-334-4813 or visit www.msleveeboard.com
